

Understanding Type 1 Diabetes

You can develop type 1 diabetes at any age.

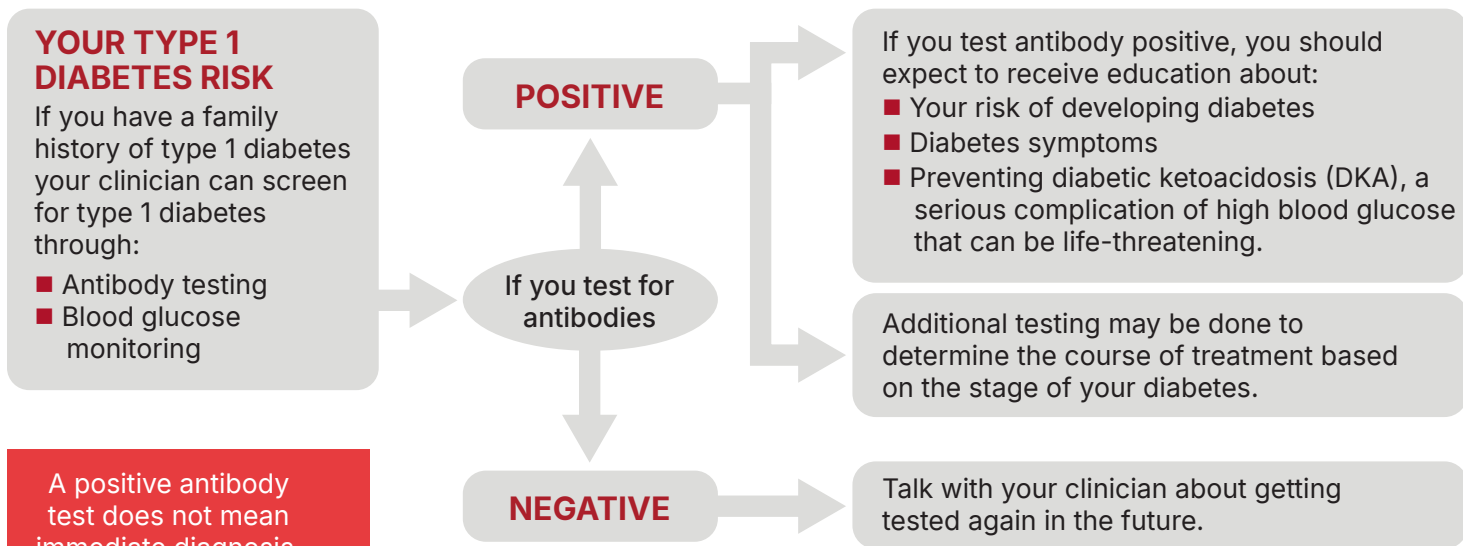

SYMPTOMS OF TYPE 1 DIABETES

- Urinating often
- Feeling very thirsty
- Feeling very hungry—even though you are eating
- Extreme fatigue
- Blurry vision
- Cuts/bruises that are slow to heal
- Weight loss—even though you are eating more

Talk with your clinician about your risk for type 1 diabetes and if you should be tested.

Learning you have type 1 diabetes early lets you take steps early to stay healthy.

A positive antibody test does not mean immediate diagnosis. New treatments and clinical trials can possibly delay the onset of type 1 diabetes.

Talk with your clinician to determine if you are high risk for Type 1 diabetes.
